Available in 8 or 10 times magnification:

The compact, light PENTAX MCF II-series porro prism binoculars cover most viewing opportunities with ease.

The high-quality BaK4 prism design in an attractive silver-gray/black housing invites the user to bring even the most difficult scenes nearer – and with a minimum focusing distance of only 3 meters, nothing can get away.

High refractive BaK4 glass prisms and aspheric lens elements provide these two light weight binoculars with outstanding optics. The ergonomic design guarantees a problem-free handling and a comfortable, firm grasp even over long periods of observation. Clearly the super-compact UCF M models fits easily into even the smallest bag. And they weigh a mere 195 grams so there's no excuse for not carrying them everywhere.
